

ANSHIT DWIVEDI

Data Analyst | SQL · Python · Power BI · Machine Learning

+91-8957720581 | anshitdwivedi1@gmail.com | [LinkedIn](#) | [GitHub](#) | Lucknow, India

PROFESSIONAL SUMMARY

Data Analyst with experience across SQL and NoSQL data — MongoDB aggregation pipelines and Firebase/Firestore — alongside Python, Power BI, and machine learning, built through a 1-year industry internship and applied projects. Comfortable across analytics workflows — data cleaning, EDA, statistical analysis, dashboarding, and predictive modeling — using Pandas, NumPy, and Scikit-learn. Delivered a churn prediction model with 85%+ accuracy and a vendor analytics project that uncovered \$2.71M in unsold inventory and a 72% bulk-purchasing cost reduction. I like taking a data problem from a vague question to a finished dashboard.

TECHNICAL SKILLS

- **Languages & Querying:** Python, SQL (MS SQL Server, MySQL), MongoDB, DAX
- **Libraries & Frameworks:** Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Plotly
- **BI & Visualization:** Power BI, Excel, Business Intelligence, Statistical Analysis, Data Visualization
- **Data Analytics:** Data Cleaning, EDA, Data Modeling, Data Validation, Hypothesis Testing, KPI Reporting
- **ML & Analytics:** AI/ML, Regression, Classification, Clustering, Feature Engineering
- **Tools & Platforms:** Git, GitHub, Jupyter Notebook, VS Code, Google Colab

PROFESSIONAL EXPERIENCE

Data Analyst Intern

Intellipaat Software Solutions Pvt. Ltd.

June 2025 – June 2026

Bengaluru, India (Remote)

- Cleaned, processed, and analyzed datasets of 10,000+ records using Python (Pandas, NumPy) and SQL, improving data accuracy and turnaround time so the team could trust the weekly report.
- Designed and built interactive Power BI dashboards tracking KPIs, so managers could check performance themselves instead of waiting on a report.
- Performed exploratory data analysis (EDA) using Python and statistical techniques to uncover patterns, correlations, and anomalies that surfaced patterns the team hadn't noticed before.
- Built and evaluated machine learning models (Logistic Regression, Random Forest) for predictive analytics and customer classification, feeding directly into next-quarter demand estimates.
- Sat with the sales and ops teams to understand what they actually needed, then built the SQL queries, Python scripts, and Power BI views to answer it.

PROJECTS

Vendor Performance Analysis – Retail Inventory & Sales

SQL, Python, Power BI

Objective: Analyzed vendor efficiency and profitability to support strategic purchasing and inventory decisions.

- Developed and optimized a complex SQL ETL pipeline to build an aggregated summary table from multiple tables; improved query performance using CTEs and data filtering, cutting processing time on large datasets.
- Conducted exploratory data analysis and hypothesis testing in Python to evaluate vendor profitability, pricing strategy effectiveness, and inventory turnover.
- Identified over-dependence on top 10 vendors (65.7% of purchases) and uncovered \$2.71M in unsold inventory from low-performing vendors, recommending diversification and inventory optimization.
- Built interactive Power BI dashboards to visualize vendor performance, profit margins, and bulk purchasing impact (72% cost reduction), showing decision-makers exactly where the money was leaking.

Customer Churn Prediction Model

Python, Scikit-learn, Pandas, Matplotlib

- Built a machine learning classification model (Logistic Regression, Random Forest) to predict customer churn with 85%+ accuracy on a telecom dataset of 7,000+ rows.
- Conducted full EDA: handled missing values, outlier detection, feature encoding, and correlation analysis using Pandas, Seaborn, and Matplotlib.
- Applied feature engineering and hyperparameter tuning to improve model F1-score by 12%, flagging which customers were worth a retention outreach.

EDUCATION

Master of Computer Applications (MCA) — Pursuing

Lovely Professional University (LPU)

July 2026 – Present

Bachelor of Commerce (Hons.)

Integral University, Lucknow

Graduated: 2024

CERTIFICATIONS

- **Advanced Certification in Data Analytics – iHUB DivyaSampark, IIT Roorkee** – In association with Intellipaat (NM-ICPS, Govt. of India)
