

ANSHIT DWIVEDI

Aspiring Data Analyst | SQL · Python · Power BI · Machine Learning
+91-8957720581 | anshitdwivedi1@gmail.com | [LinkedIn](#) | [GitHub](#) | Lucknow, India

PROFESSIONAL SUMMARY

Aspiring Data Analyst with hands-on experience in SQL, Python, Power BI, and machine learning, built through a 6-month industry internship and applied projects. Skilled in end-to-end analytics workflows — data cleaning, EDA, statistical analysis, dashboarding, and predictive modeling — using Pandas, NumPy, and Scikit-learn. Delivered a churn prediction model with 85%+ accuracy and a vendor analytics project that uncovered \$2.71M in unsold inventory and a 72% bulk-purchasing cost reduction. Looking to apply strong analytical skills and a business-first mindset to a full-time Data Analyst role.

TECHNICAL SKILLS

- **Languages & Querying:** Python, SQL (MS SQL Server, MySQL), DAX
- **Libraries & Frameworks:** Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Plotly
- **BI & Visualization:** Power BI, Excel, Business Intelligence, Statistical Analysis, Data Visualization
- **Data Analytics:** Data Cleaning, EDA, Data Modeling, Data Validation, Hypothesis Testing, KPI Reporting
- **ML & Analytics:** Regression, Classification, Clustering, Feature Engineering
- **Tools & Platforms:** Git, GitHub, Jupyter Notebook, VS Code, Google Colab

PROFESSIONAL EXPERIENCE

Data Analyst Intern

Intellipaat Software Solutions Pvt. Ltd.

May 2025 – Nov 2025

Bengaluru, India (Remote)

- Cleaned, processed, and analyzed datasets of 10,000+ records using Python (Pandas, NumPy) and SQL, improving data accuracy and turnaround time for business reporting and decision-making.
- Designed and built interactive Power BI dashboards tracking key performance indicators (KPIs), giving stakeholders real-time visibility into business performance and trends.
- Performed exploratory data analysis (EDA) using Python and statistical techniques to uncover patterns, correlations, and anomalies that informed business recommendations.
- Built and evaluated machine learning models (Logistic Regression, Random Forest) for predictive analytics and customer classification, supporting data-driven business forecasting.
- Worked closely with cross-functional teams to translate business requirements into SQL, Python, and Power BI deliverables, ensuring analyses aligned with stakeholder needs.

PROJECTS

Vendor Performance Analysis – Retail Inventory & Sales

SQL, Python, Power BI

Objective: Analyzed vendor efficiency and profitability to support strategic purchasing and inventory decisions.

- Developed and optimized a complex SQL ETL pipeline to build an aggregated summary table from multiple tables; improved query performance using CTEs and data filtering, significantly reducing processing time for large datasets.
- Conducted exploratory data analysis and hypothesis testing in Python to evaluate vendor profitability, pricing strategy effectiveness, and inventory turnover.
- Identified over-dependence on top 10 vendors (65.7% of purchases) and uncovered \$2.71M in unsold inventory from low-performing vendors, recommending diversification and inventory optimization.
- Built interactive Power BI dashboards to visualize vendor performance, profit margins, and bulk purchasing impact (72% cost reduction), delivering actionable insights for decision-makers.

Customer Churn Prediction Model

Python, Scikit-learn, Pandas, Matplotlib

- Built a machine learning classification model (Logistic Regression, Random Forest) to predict customer churn with 85%+ accuracy on a telecom dataset of 7,000+ rows.
- Conducted end-to-end EDA: handled missing values, outlier detection, feature encoding, and correlation analysis using Pandas, Seaborn, and Matplotlib.
- Applied feature engineering and hyperparameter tuning to improve model F1-score by 12%, ensuring actionable retention recommendations.

EDUCATION

Bachelor of Commerce (B.Com)

2021 – 2024

Integral University, Lucknow, Uttar Pradesh

- Relevant Coursework: Business Statistics, Financial Analysis, Data-Driven Decision Making
- Applied quantitative and analytical methods to real-world business case studies

CERTIFICATIONS

- **SQL Certificate** – Verified credential in advanced SQL querying and database management
- **Power BI Certificate** – Certified in data modeling, DAX, and interactive dashboard development
- **Python Certification – Intellipaat** – Certified in Python programming for data analytics
- **Advanced Certification in Microsoft Excel – Intellipaat** – Advanced Excel for data analysis and reporting
- **Advanced Certification in Data Analytics – iHUB DivyaSampark, IIT Roorkee** – In association with Intellipaat (NM-ICPS, Govt. of India)
